TIN LIZZIE GAZETTE

President's Note - April, 2018

As you know, one of our planned activities for celebrating our 20th Anniversary is to share the wonders of the Model T with a technical school. George has contacted Windham Tech (automotive department) and they have enthusiastically welcomed us. The school is currently looking for an appropriate date for us to come and this means we may only have a very short notice to get prepared.

We need your support for this event on two fronts. First, by being willing to attend and display your vehicle at the school whenever the date is established. The students will certainly appreciate seeing all of our cars up close and being able to ask questions about them. Secondly, as part of the program we plan on hosting a discussion about the Model T with a focus on the mechanical aspects of the T and we will have the *cut-away engine* there on display as a prop. If you are willing to help get the engine completed and ready to go please contact me ASAP.

We will talk more about this at our April monthly meeting.

I am tired of shoveling so please... Think Spring!

Pete
